

Summary:

Given the sales transaction data set for the whole year predict the data for next year and display the chart and grid

Work Items

1. Write ML model using the sales data and do predictions for next year and 2 years
2. Write a REST API which will invoke ML model
3. Create a UI page which calls the RestAPI and display the chart (bar chart or pie-chart and a grid)

React

You can use optional tech ex:
Angular, C#.Net, Java,
